Maryam Moradian

Product Designer

Düsseldorf, Germany · +49 178 8842188 · maryam.moradian38@gmail.com · linkedin.com/in/maryam-moradian · maryammoradian.com

Professional summary

Product Designer with 7+ years in design, 4+ of them in digital product design, focused on complex B2B and health workflows. I work end to end, often as the sole designer, from workflow mapping and research through developer handoff. My strongest work makes technical and AI-driven output understandable for users with different levels of expertise. M.Sc. in Human-Computer Interaction, with a thesis on AI-assisted diabetic foot care.

Selected highlights

- Fizik 121 Platform: sole designer of a 0 to 1 guided workflow tool with more than 60 screens, adapted for Android and iOS, that lets bike shop staff run a personalized saddle service in six languages, narrowing 121 saddle options to a shortlist of two or three. Its design system and workflow structure carried into a second product, now in its second version.
- Preventive Foot Care Platform (HCI thesis, graded 1.0): one system for two user types with different data literacy, built on layered detail and insight framing. Expert usability testing with professionals from four fields confirmed the structure.
- Design systems across 9 projects and 5 brands, built so a product can be rebranded for a new client by swapping logo, colors and component libraries, and documented to reduce ambiguity at developer handoff.
- Product pitches for 3 products that contributed to funding approval for all three.

Professional experience

Product Designer | GEBIOM Group — Feb 2022 to present

Product Designer, full-time, from Oct 2023. Joined as UX/UI Designer, part-time, Feb 2022 to Aug 2023.

- Own product design end to end across web and mobile, from problem definition and discovery to implementation-ready specs, for B2B medtech tools and B2C retail experiences.
- Work as the only designer in a product team of 4 to 6 developers (one a freelancer), a product manager and a product owner, often alongside a client team, on two or more products at the same time.
- Run user research and usability testing; findings shaped workflow redesigns and informed go or no-go decisions on feature directions.
- Align engineering, product and external research partners on trade-offs between user needs, technical constraints and business priorities.
- Work with the University of Siegen research group to bring clinical findings into product decisions.
- Use AI tools daily for research synthesis, spec writing and edge case review, and Claude Code for rapid prototyping. Built my portfolio website with Claude Code.

Research Assistant, Web Content Manager | University of Siegen — Sep 2021 to May 2023

Part-time, alongside my M.Sc.

- Kept university website content up to date, with HTML and responsive layout updates to improve clarity and accessibility of student-facing information.
- Prepared presentation slides for a professor's pitches to win research projects.

Freelance 3D Designer | Independent — Feb 2019 to Sep 2020

3D modeling in Rhino for several clients on varied topics, alongside English study for graduate admission in Germany.

Lead Industrial Designer | Mesina Group — Jul 2018 to Jan 2019

- Led the team that turned approved designs into produced products, with quality control in the workshop to keep the result as close as possible to what was promised to the client in the design.
- Ran user research and market analysis to shape design priorities, and built and tested prototypes to validate concepts before manufacturing.
- Worked with engineering and manufacturing to balance form, function and delivery constraints.

Lead Industrial Designer | NTP Design — Aug 2017 to May 2018

- Led implementation of designed products in the workshop, checking quality against the design promised to the client.
- Developed 3D models, supported design validation, and proposed new product concepts aligned with user needs and business opportunities.

Education

M.Sc. Human-Computer Interaction | University of Siegen, Germany — Oct 2020 to May 2024

Thesis grade 1.0. Thesis: Promoting regular care for preventing diabetic foot diseases using foot mapping technologies and artificial intelligence.

M.Sc. Industrial Design | Alzahra Art University, Tehran — Jan 2016 to Jul 2017

B.Sc. Industrial Design | Tabriz Art University, Tabriz — Jan 2011 to Sep 2015

Skills and languages

Product design: End-to-end product ownership, complex workflow design, UX research and usability testing, design systems, information architecture, interaction design, accessibility (WCAG), mobile design for Android and iOS, developer handoff, stakeholder alignment

Tools: Figma, FigJam, Miro, Jira, Azure DevOps, Confluence, HTML/CSS, Rhino (3D modeling), Claude Code (AI-assisted prototyping)

Languages: Persian (native), English (professional), German (B1, actively progressing)
